EXPERIENCE

Nittio Learn, Bangalore — Senior Backend Engineer

AUGUST 2020 - PRESENT

- Solely created a scalable and highly efficient automation server based on python and deployed that to Google Compute Engine.
- Wrote an intelligent python based Asynchronous Database Abstraction Layer that automatically connects with either sqlite or Google Datastore and performs the query.
- Led the porting of Python2 code to Python3.
- Coached freshers on Backend, Frontend and other Tech Related Problems.

Glam Studios, Noida — Lead Software Engineer

JULY 2016 - JULY 2020

- Worked on the Glam Studios Website on both Frontend and Backend (Laravel, HTML, CSS, Javascript)
- Worked on a Salon Management System. (Laravel, HTML, CSS, Javascript)
- Created a Lead Management System. (Django, HTML, CSS, Javascript)

Hashtags, Noida — Growth Hacker

DECEMBER 2015 - JULY 2016

- Cross sold digital marketing to all the clients who got their website designed by us.
- Generated leads of people interested in getting their website designed or in digital marketing.
- Sold Website Development to 10 cold leads in one week.

PROJECTS

Face ID for MacOS — OpenCV, Python

Like the name suggests I implemented an iOS' Face ID like functionality in MacOS.

Innocent Siri — Golang, Python

One of a kind virtual assistant that doesn't steal your data and yet gets the work done! I figured out a way to convert speech to text locally without making any server requests and then to process commands gotten from the speech.

MSorryWhat!? — IFTTT, Javascript

A cool tool which listens to your online meetings and notifies you on your phone whenever your name / or any other thing pre defined by you is heard.

SKILLS

Rest API / Flask

Data Structures and Algorithms

Cloud Computing (IAAS , PAAS)

SQL and NoSQL

Svelte and Vue JS

ACCOMPLISHMENTS

Secured rank 1 in Python on HackerRank.

Secured a 5 star badge in Python on HackerRank.

Secured a 4 star badge in Problem Solving on HackerRank.

LANGUAGES

Python, Golang, Javascript
